EDUCATION

- **International Institute of Information Technology, Bangalore**
M.Tech (Computer Science and Engineering) (July 2022 – July 2024) CGPA: 3.07/4
- **Banaras Hindu University**
Master of Science (July 2019 – May 2021) CGPA: 9.21/10

EXPERIENCE

- Software Engineer, Addverb Technologies** July 2024 - Oct 2025
- Built and delivered a new portal for Finance & Legal teams to automate workflows, replaced slow email processes and increased team efficiency by 50%, saving over 20 hours of manual work per week.
 - Owned the full-stack architecture using **React.js, Spring Boot, and MongoDB**, automated the migration of 10,000+ Excel records and used **Zod for strict validation** to prevent data errors and ensure system reliability.
 - Drove engineering excellence by **achieving 90%+ code coverage with JUnit and Mockito**, this effort reduced production bugs by 40% and made the deployment process much faster and more reliable.
 - Guided performance improvements by **optimizing MongoDB queries and front-end loading improved API speed by 30%** and **reduced page load times by 28%** for better user experience.
- Software Engineer Intern, Addverb Technologies** January 2024 - July 2024
- Refined Warehouse Execution System (WES) throughput by mathematically optimizing sortation algorithms and developing the end-to-end implementation in Java, delivered an 18% efficiency gain across 3 large-scale projects, helping process 400+ additional units per hour.
 - Developed 50+ Grafana dashboards to monitor key operational metrics, enabling data-driven decisions and reducing system downtime by 25% through faster incident response.
 - Automated log data extraction for the engineering team, eliminating manual analysis and boosting debugging efficiency by 20% while saving 10+ developer hours every week.

PROJECTS

- Fitness Tracking & AI Recommendation System** March 2026 - current
- Tech Stack: Java, Spring Boot, Generative AI (Gemini API), RabbitMQ, PostgreSQL, MongoDB, Docker — Code*
- Independently architected a scalable microservices platform using Spring Boot, implementing Spring Cloud Gateway and Eureka to manage 5+ internal services.
 - Engineered an AI-driven recommendation engine using the Gemini API and RabbitMQ; handled intensive LLM queries asynchronously, reducing user wait time by 85% and ensuring low-latency interactions.
 - Optimized data management using a polyglot persistence strategy with PostgreSQL and MongoDB, improved query speeds by 40% for high-velocity activity logs and AI-generated insights.
 - Accelerated deployment cycles and ensured consistency by containerizing the entire 7-node microservice ecosystem with Docker Compose, reducing local environment setup time from 1 hour to under 5 minutes.
- Healthcare Consent Management System** January 2023 - May 2023
- Tech Stack: Spring Boot, React.js, Microservices, REST APIs, API Gateway, Eureka, Bootstrap CSS*
- Designed a user-friendly React interface for managing patient consent, making it easy for users to grant or revoke access and secure their document privacy.
 - Collaborated with team members to build 4 microservices for authentication, patient, hospital, and management, ensuring smooth integration
 - Partnered with peers to develop 20+ RESTful APIs and a responsive React frontend, using Redux for state management to reduce data sync issues across service modules by 40%.

TECHNICAL SKILLS

- **Languages & Frameworks:** Java, Spring Boot, C++, TypeScript, JavaScript, React.js, Redux
- **Backend & Databases:** MySQL, MongoDB, Redis, RabbitMQ, Microservices, REST APIs
- **Testing & Tools:** JUnit, Mockito, Docker, Git, Grafana, Docker Compose
- **Frontend Libraries:** Tailwind CSS, ShadCN UI, Zod, TanStack Query, Zustand, HTML/CSS
- **AI & Machine Learning:** Generative AI, Gemini API

ACHIEVEMENTS

- GATE (CS/IT) - All India Rank 1321** March 2022
- 98.6th Percentile — Score: 609/1000*
- Data Structures & Algorithms**
- Solved 600+ problems on **LeetCode** and 600+ problems on **GeeksforGeeks***
